

Test Scenario ID	1	Test Case ID	1		
Test Case Description	Test validation of wrong data	Test Priority	High		
Pre-Requisite	Non-valid personal data	Post-Requisite	Information from system about non-valid data, non-registered personal data		
Test Execution Steps: Provide non-valid personal data into registration and try to submit it					
S.No	Action	Inputs	Expected Output	Real Output	
1	Submitting of data	First name length > 15	Information from system about non-valid data. System asks to input personal data	Information from system about non-valid data. System asks to input personal data	
2		Second name > 15			
3		Affiliation > 30			
4		E-mail address in format “email.text”			
5		E-mail address length >30			
6		Password length < 5			
7		Password length >5			
8		Password doesn’t contain number			
9		Password2 is not the same as Password			
10		Year of birthday is not in range from 1900...current Year-10			

Test Scenario ID	2	Test Case ID	2		
Test Case Description	Test validation of personal data with email that is already in the system	Test Priority	High		
Pre-Requisite	Personal data with non-valid email	Post-Requisite	Information from system about non-valid data, non-registered personal data		
Test Execution Steps: Provide non-valid personal data into registration and try to submit it					
S.No	Action	Inputs	Expected Output	Real Output	
1	Submitting of data	Email address which is registered in the system	System validates that personal data are improper	System validates that personal data are improper	

Test Scenario ID	2	Test Case ID	2		
Test Case Description	Test validation of personal data with email that is already in the system	Test Priority	High		
Pre-Requisite	Personal data with non-valid email	Post-Requisite	Information from system about non-valid data, non-registered personal data		
Test Execution Steps: Provide non-valid personal data into registration and try to submit it					
S.No	Action	Inputs	Expected Output	Real Output	
1	Submitting of data	Email address which is registered in the system	System validates that personal data are improper	System validates that personal data are improper	

Test Scenario ID	3	Test Case ID	3
Test Case Description	Test validation of activation of non-existing account	Test Priority	High
Pre-Requisite	Activation of non-existing account	Post-Requisite	Information from system about non-valid account. Non-activated account

Test Execution Steps: Provide non-valid activation account on activation step					
S.No	Action	Inputs	Expected Output	Real Output	
1	Activation of non-existing account	Non-existing account for activation	System validates that account doesn't exist and shows error message	System validates that account doesn't exist and shows error message	

Task 3
